SUMMARY

Software Engineer with 4.7+ years of experience building scalable Flutter and Android applications across FinTech, Trading, Travel, Healthcare and Social Media domains. Experienced in designing production-grade mobile architectures using BLoC, Riverpod, Clean Architecture and MVVM. Strong expertise in REST APIs, Firebase, payment gateway integration, native Android development and delivering high-quality applications for Android and iOS.

SKILLS

Languages	Dart , Kotlin, Java
Frameworks	Flutter , Android
State Management	BLoC, Riverpod, Provider, GetX
Architecture	Clean Architecture, MVVM
Database	Firebase, Firestore, Realtime Database, MySQL, Hive, Sqflite
Tools	Git, GitHub, CI/CD
Others	REST APIs, Razorpay, Cashfree, Google Maps, FCM, MethodChannel, ...

EXPERIENCE

Senior Software Engineer (Flutter)

Jan 2026 – Present

Bigul *Mumbai, India*

- Built the complete IPO investment module using Flutter and BLoC architecture, including IPO listing, details, subscription flow and application tracking.
- Designed and developed the Corporate Actions module supporting Bonus, Dividend, Split and Rights issue information.
- Engineered a scalable Financial News module with category-based filtering and real-time market news integration.
- Developed Stock Overview screens with company fundamentals, financial metrics, market depth and performance insights.
- Implemented Watchlist functionality with optimized state management and real-time synchronization across devices.
- Built Stock SIP investment workflow using Riverpod with reusable providers and modular architecture.
- Integrated Razorpay and Cashfree payment gateways with secure transaction verification and seamless payment experience.
- Collaborated closely with backend, QA and product teams to deliver production-ready trading features while maintaining clean architecture and reusable codebase.

Software Engineer

Apr 2023 – Oct 2025

Edugaon *Amnour, Bihar*

- Led Flutter and Android application development for multiple production applications across travel, fintech and education domains.
- Architected scalable applications using MVVM and Clean Architecture with reusable components.
- Developed backend microservices using Node.js and Firebase.
- Mentored junior developers, reviewed pull requests and collaborated directly with founders and clients.
- Managed complete application lifecycle including Play Store and App Store releases.

- Developed Android and Flutter applications across healthcare, social networking and business domains.
- Integrated Firebase Authentication, Firestore, FCM and REST APIs.
- Built reusable UI components and optimized application performance.
- Worked closely with designers and backend teams to deliver production-ready applications.

PROJECTS

Bigul - Trading Platform

Developed core trading features including IPO, Corporate Actions, Financial News, Stock Overview, Watchlist, and Stock SIP using Flutter, BLoC, and Riverpod. Integrated Razorpay and Cashfree payment gateways, optimized state management, and collaborated with cross-functional teams to deliver scalable, production-ready fintech solutions following Clean Architecture. [Android](#) and [IOS](#)

RoadBez - Cab Booking Platform

Worked on the RoadBez Cab platform, contributing to the end-to-end booking flow and improving the overall user experience. Diagnosed and resolved notification issues across multiple booking and application scenarios, ensuring users received timely and reliable updates. Implemented and refined booking-flow logic, handling different booking states and edge cases to improve reliability and consistency. [Android](#) and [IOS](#)

DigiPrivilege - Resort Booking Platform

Developed a complete resort membership ecosystem consisting of [Customer](#), [Partner](#) and [Executive](#) applications with membership, coupons, Razorpay payments, Firebase and Node.js backend.

Chardham - Travel Booking App Built a travel booking application supporting hotel, cab and helicopter booking with Firebase, Razorpay, FCM and REST APIs for [Android](#) and [IOS](#).

Supfrica Messenger

Developed a feature-rich messaging and social networking application with real-time chat, voice/video calling, stories, groups, live streaming, and Firebase integration, delivering a secure, scalable, cross-platform communication experience. [Android](#) and [IOS](#)

EDUCATION

M.S. Artificial Intelligence & Cyber Security

Expected 2027

Indian Institute of Technology Patna

Bachelor of Arts (English Honours)

2023

J.P. University

Professional Diploma in Software Engineering

2021

Edugaon

ACHIEVEMENTS

- Awarded Best Employee of the Year (2024).
- Successfully delivered production Flutter applications across Trading, Travel, Healthcare, FinTech and Social Media domains.
- Published multiple Android and iOS applications on Google Play Store and Apple App Store.
